

Please join us for **Scratch Day** at the Arlington Career Center on **Saturday, May 22nd, 2010** from 1-4 p.m. Our kid-friendly theme this year is “**Scratch Circus.**” We plan to have three activities running simultaneously during the afternoon. Like last year’s event, there will be learning, fun and prizes!

For kids, we will have computer labs open and ready for games, learning about Scratch computer programming, sharing games the children have written, and trying out games. If kids have taken a Scratch class or created a Scratch game, please bring your login information or flash drive to share what you have created! For teens, we will have a workshop and learning activity. For teachers, APS's own Dr. Ann Kennedy and Jeffrey Elkner are offering a workshop for educators.

Scratch is a free programming language developed by the [Lifelong Kindergarten Group](#) at the [MIT Media Lab](#) that makes it easy to create your own interactive stories, animations, games, music, and art — and [share](#) your creations on the web. Scratch is available at www.scratch.mit.edu. Questions or RSVP, please contact Phoebe Bennett, wcpb@msn.com or Jeff Elkner at jeff@elkner.net. The Arlington Career Center is located at 816 S. Walter Reed Dr., Arlington, Virginia, 22204 near Columbia Pike.
